DETAILED ACTION

1. This communication is responsive to Amendment filed 01/10/2008.
2. Claims 1-24 are pending in this application. Claims 1, 11, and 21-22 are independent claims. In Amendment, claims 1, 11, and 21-22 are amended. This Office Action is made non-final after a RCE filed 01/10/2008.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-24 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-24 cite a method and apparatus for determining the interval of which the sum of two numbers is resided in accordance with a mathematical algorithm. However, claims 1-24 merely disclose steps/components for determining the interval of which the sum of two numbers is resided without further disclosing a practical/physical application. Further, the claims appear to preempt every substantial practical application of the idea embodied by the claims. Therefore, claims 1-24 are directed to non-statutory subject matter.

Response to Arguments

5. Applicant's arguments filed 01/10/2008 have been fully considered but they are not persuasive.

a. The applicant argues in page 9 last paragraph for claims 1-24 that the claims should be statutory since they claim a circuit having fewer than n compress circuits since a separation compare circuit for each interval is expensive and consumes device real estate.

The examiner respectfully submits that feature of having fewer than n compress circuits due to less expressive and consume less real estate in the device is not directly seen or cited in the claim. The applicant is suggested further include this feature into the claims.
